of Disegno Ceramica

L'EQUILIBRIO INTELLIGENTE TRA MATERIA, DESIGN E FUNZIONALITÀ

THE SMART BALANCE OF MATERIAL, DESIGN, AND FUNCTIONALITY

Dualia introduce un equilibrio materico intelligente, in grado di superare i limiti tecnici dei materiali compositi, senza rinunciare all'impatto visivo e progettuale.

Nel panorama attuale dell'arredo bagno e dei sistemi integrati, i piani in grès e HPL con vasche dello stesso materiale presentano spesso criticità legate alla durabilità, alla resistenza all'usura, all'igiene e alla manutenzione.

Disegno Ceramica risponde a queste esigenze reali con un progetto innovativo che unisce l'estetica e la modularità dei grandi formati in grès e HPL alla resistenza, pulibilità e qualità percepita di una vasca in ceramica.

Si tratta di una naturale evoluzione del percorso che l'azienda sta portando avanti nella ricerca sulla materia, avviato con Malta Ceramica® — la collezione che ha ridefinito il valore tattile, visivo e tecnico della ceramica.

Dualia ne raccoglie l'eredità, portando avanti una visione che coniuga design, innovazione e funzionalità, e riafferma la centralità della ceramica come elemento risolutivo e distintivo.

Dualia introduces an intelligent material balance, capable of overcoming the technical limits of composite materials without compromising visual and design impact.

In today's bathroom furniture and integrated systems landscape, tops in stoneware and HPL with basins made of the same material often present issues related to durability, wear resistance, hygiene, and maintenance.

Disegno Ceramica addresses these real needs with an innovative project that combines the aesthetics and modularity of large formats in stoneware and HPL with the strength, ease of cleaning, and perceived quality of a ceramic basin.

This represents a natural evolution of the company's ongoing research into materials, first initiated with Malta Ceramica® — the collection that redefined the tactile, visual, and technical value of ceramics.

Dualia inherits this legacy, carrying forward a vision that blends design, innovation, and functionality, reaffirming the central role of ceramics as a distinctive and problem-solving element.

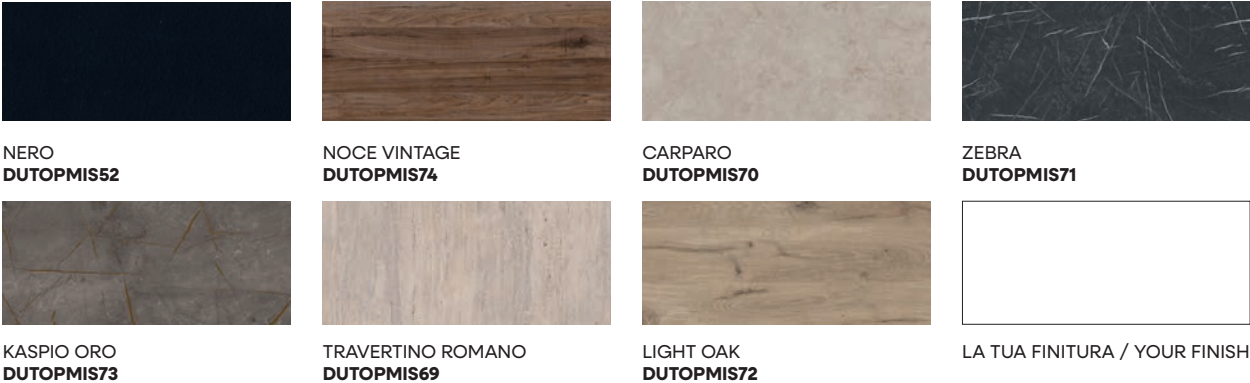

ESPRESSIONE DI PROGETTAZIONE E PERSONALIZZAZIONE PER IL BAGNO

THE ESSENCE OF DESIGN AND CUSTOMIZATION FOR THE BATHROOM

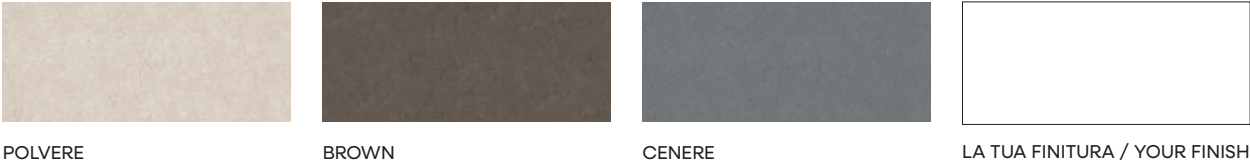

Dualia è il progetto che meglio racconta la capacità di Disegno Ceramica di essere OEM. Un concept che nasce dalle texture e dalle ceramiche selezionate dall'azienda, ma che lascia al cliente la libertà di scegliere il proprio piano in gres o HPL e di completarlo con una vasca integrata nel colore ceramico personalizzato, in perfetta armonia con il design.

Dualia is the project that best expresses Disegno Ceramica's ability to act as an OEM partner. It starts from the company's selected textures and ceramics, while giving the client the freedom to choose their own countertop in stoneware or HPL, completed with an integrated basin in a customized ceramic color, perfectly matching the design.

Possibilità di personalizzare la vela oppure scegliere tra tre dimensioni standard: 7, 14 o 21 cm.

Possibility to customize the side panel or choose from three standard heights: 7, 14, or 21 cm.

I piani Dualia sono pensati per adattarsi a tutte le esigenze progettuali

Dualia countertops are designed to adapt to all design requirements.

La vasca integrata di Dualia non presenta spigoli vivi, garantendo la massima igiene e una pulizia semplice.

Si fonde perfettamente con il piano grazie a un unico punto di giunzione, studiato per eliminare zone critiche e mantenere la superficie continua e ordinata.

Il colore della ceramica si armonizza con quello del piano, creando un effetto monocromatico elegante e coerente che rafforza l'identità del design.

The integrated basin of Dualia has no sharp edges, ensuring maximum hygiene and easy cleaning.

It blends seamlessly with the countertop through a single junction point, designed to eliminate critical areas and maintain a continuous, smooth surface.

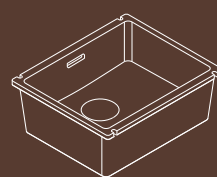

The ceramic color perfectly matches that of the countertop, creating an elegant and consistent monochromatic effect that reinforces the design identity.

HPL Noce Vintage

Il calore del legno incontra la resistenza dell'HPL: Noce Vintage racconta un effetto materico autentico, capace di donare al progetto un'anima accogliente e senza tempo.

The warmth of wood meets the strength of HPL: Vintage Walnut conveys an authentic material effect, giving the project a welcoming and timeless soul.

 Ceramica Smoked Oak

 HPL Noce vintage

HPL Kaspio oro

Suggestioni minerali e riflessi dorati definiscono Kaspio Oro: una finitura che richiama l'eleganza del marmo e aggiunge preziosità al progetto con le sue venature uniche.

Mineral suggestions and golden reflections define Kaspio Oro: a finish that evokes the elegance of marble and enriches the project with its unique veining.

Ceramica Moka

HPL Kaspio Oro

HPL Viking Oak

La luminosità naturale del rovere incontra la resistenza dell'HPL: Viking Oak porta negli spazi la leggerezza dei toni chiari e l'equilibrio senza tempo del legno.

The natural brightness of oak meets the strength of HPL: Viking Oak brings the lightness of pale tones and the timeless balance of wood into every space.

Ceramica Light Oak

HPL Viking Oak

HPL Carparo

Ispirato alla pietra naturale, HPL Carparo esprime solidità e matericità autentica. Una finitura che dona al progetto un carattere essenziale, elegante e resistente.

Inspired by natural stone, HPL Carparo conveys solidity and authentic materiality. A finish that gives the project an essential, elegant, and durable character.

Certificazioni

Certifications

Sistema Qualità
Certifica come Disegno Ceramica pianifica, attua, monitora e migliora sia i processi operativi che quelli di supporto, progettando e implementando il sistema di gestione qualità come mezzo per raggiungere gli obiettivi.

Quality System
Certifies how Disegno Ceramica plans, implements, monitors and improves both operational and supporting processes, designing and implementing the quality management system as a means of achieving targets.

Sistema di Gestione per la Salute e Sicurezza sul lavoro
Certifica come Disegno Ceramica fornisce posti di lavoro sicuri e salubri prevenendo infortuni sul lavoro e problemi di salute.

Management System for Health and Safety at Work
Certifies how Disegno Ceramica provides safe and healthy workplaces by preventing occupational accidents and health problems.

Sistema di Gestione Ambientale
Certifica che l'intera linea produttiva rispetta standard ambientali riguardanti inquinamento ed emissioni. Tale certificazione dimostra come Disegno Ceramica tiene sotto controllo gli impatti ambientali delle proprie attività e ne ricerca sistematicamente il miglioramento, in modo coerente, efficace e soprattutto sostenibile.

Environmental Management System
It certifies that the entire production line respects environmental standards regarding pollution and emissions. This certification demonstrates that Disegno Ceramica keeps the environmental impact of its activities under control and systematically seeks to improve them in a coherent, effective and above all sustainable manner.

Sistema di Gestione dell'energia
Certifica come Disegno Ceramica adotta un sistema di gestione dell'energia sano, riducendo il consumo di energia, l'impatto ambientale e aumentando la redditività. Definisce i requisiti per le pratiche di gestione che sono importanti per ottenere una migliore performance energetica. Dimostra che l'uso efficiente dell'energia è prioritario durante tutto il processo e che l'energia è gestita sistematicamente

Energy Management System
Certifies that Disegno Ceramica adopts a sound energy management system, reducing energy consumption and environmental impact while increasing profitability. It defines the requirements for management practices that are essential to achieving better energy performance. It demonstrates that efficient energy use is a priority throughout the entire process and that energy is managed systematically.

Avvertenze

Consigliamo di adoperare sempre panni morbidi in microfibra non abrasivi.
Consigliamo di asciugare sempre le superfici dopo il loro utilizzo, per evitare che si formino antiestetiche macchie di calcare dipese dall'acqua utilizzata.

È **sconsigliato** l'utilizzo di spugne abrasive o spazzole dure.

Inoltre, è **fondamentale** leggere attentamente le istruzioni del detergente adoperato **rispettandone i tempi di posa**.

Un regolare lavaggio con candeggina e acqua calda consente di eliminare le macchie di calcare e igienizzare il sanitario.

Each piece is crafted with care, Malta Ceramics is made with ceramic pigments applied to already glazed products, ensuring the preservation of the fundamental characteristics of our products. With our attention to detail and quality, we offer textures that stand out for their beauty and durability. This manufacturing process ensures that ceramic products retain all their intrinsic qualities, such as strength and long-term durability.

Warnings:
We recommend using soft, non-abrasive microfiber cloths.
Always dry surfaces after use to prevent unsightly lime stains caused by water.
Avoid using abrasive sponges or hard brushes.
Additionally, it is essential to carefully read the instructions of the detergent used and adhere to the recommended soaking times.
Regular washing with bleach and hot water helps remove lime stains and sanitize the sanitary ware.
